INTERNSHIPS AND PROJECTS

Projects	**CollegeConnect** CollegeConnect is an Android App based on Social Media for finding friends in a certain college and making friends, posting images and for chatting between one another.For this i used Firebase as a backend database.I have done this project for self.. **Stock Market Prediction** I have done this project using Machine Learning algorithms.The main aim of this project is predict the future values from the past observed values. The successful prediction of a stocks future price could yield significant profit. The efficient market hypothesis suggests that stock prices reflect all currently available information and any price changes that are not based on newly revealed information thus are inherently unpredictable. I have done this project with the help of three people..

PERSONAL DETAILS
